Publication Language: English

Filing Language: English

Fulltext Word Count: 9869

Patent Applicant/Inventor:

SELLEN Abigail Jane ...

Main International Patent Class: G06F-017/60

Fulltext Availability:

Detailed Description
Claims

English Abstract

...the first electronic diary from the first computing device to the
second computing device for **comparison** with the second electronic
diary.

Detailed Description

... electronic diary from the
I 0 first computing device to the second computing device for **comparison**
with the second electronic diary.

In a fifth aspect, the invention provides a computer program...the first
electronic diary from the first
computing device to the second computing device for **comparison** with the
second electronic diary.

The users could then discuss a potential meeting, each viewing...

Claim

... claims 8 to 11, wherein the
representation is stored temporarily in the memory for **comparison** with
a diary stored in the memory and wherein the processor running the diary
application...events from the first electronic diary are stored
temporarily in the second computing device for **comparison** with the
second electronic diary and are deleted from the second computing device
after the **comparison** is completed.

31 A method of sharing diary events as claimed in any of claims...the first electronic diary from the first computing device to the second computing device for **comparison** with the second electronic ... electronic diary is stored temporarily on the second computing device and is deleted when the **comparison** with the second electronic diary is completed.

35 A method of sharing diary events as...

Shopping assistance server retrieves stored advertising information
corresponding to desired goods to be purchased by customer and displays
retrieved information...

Abstract (Basic):

... A database (204) stores a purchasing log containing
information corresponding to desired goods to be purchased by a
customer. An acquisition unit (208) retrieves advertising information
corresponding to the desired goods, based on the stored purchasing
log. The retrieved advertising information and the purchasing log
are displayed along with stock information, as a web page to the
requesting customer.

Product location information broadcasting method in store , involves comparing item information in received site signal with pre- stored purchase item information by PDA to display matching result

Abstract (Basic):

... A site signal representing item records comprising an item identifier, item location and item description, is broadcast to a remote device such as PDA (10). The PDA compares item information in the site signal with pre-stored purchase item information and displays the matching result.

SHOPPING INFORMATION RECORDING SYSTEM

PUB. NO.: 2004-062523 [JP 2004062523 A]

PUBLISHED: February 26, 2004 (20040226)

INVENTOR(s): SAKAGUCHI TETSUSHI

APPLICANT(s): MATSUSHITA ELECTRIC IND CO LTD

APPL. NO.: 2002-219931 [JP 2002219931]

FILED: July 29, 2002 (20020729)

INTL CLASS: G06F-017/60

ABSTRACT

PROBLEM TO BE SOLVED: To provide a method of displaying shopping information making it possible to collect information about shops in a shopping center and merchandise information , while enabling clients to see to which shop this information pertains.

SOLUTION: A user enters a shopping center carrying a cell phone 30. In entering, data on a map of the shopping center is transmitted to the cell phone 30 from a shopping center server 15 via a gate base station 20. At a shop in the shopping center which the user entered, the user can obtain shop information from the shopping center server 15 via a shop base station 25. After obtaining the shop information , the user can display the shop information on the cell phone as it is associated with the map . Thus, the user can store in the cell phone information about at which shop the shop information was obtained.

ABSTRACT

PROBLEM TO BE SOLVED: To easily compare **information** such as the **prices**, performance and contents of **merchandise** and a service.

SOLUTION: An **information** providing server goes around virtual **stores** on Web and **collects** HTML **data** (step n1), compares the HTML **data** with a **merchandise** name of a **merchandise** name dictionary table 7 in retrieval (step n2), **collects** **information** such as the **merchandise** **price** of the **merchandise** name of the **merchandise** name dictionary table 7 and the names of **stores** **selling** the **merchandise** at the **price** and **stores** the **price** in a **merchandise** **price** database while associating the **price** with the **merchandise** name and the **store** names (step n3), and receives a request for **merchandise** **price** **comparison** **information**, etc., from a user **portable** **telephone** set and transmits the **price** **comparison** **information**, etc., to the **portable** **telephone** set (step n4).

ABSTRACT

PROBLEM TO BE SOLVED: To efficiently support **shopping**.

SOLUTION: When a user purchases **merchandise** at a **store** 14, and the **data** of the purchased **merchandise** is **recorded** in a **PDA** terminal 10 and transmitted to a user's home server 12a from the terminal 10. The **data** of purchased **merchandise** are **stored** in the home server 12a. When the user later performs **shopping** at the **store** 14, the user accesses the home server 12a by operating the **PDA** terminal 10 and **displays** the **merchandise** **data** on the terminal 10. The user can decide what **merchandise** to be purchased by checking **displayed** **items**.

PRICE COLLECTING METHOD IN THE CASE OF EC TRANSACTION USING PORTABLE
TELEPHONE

PUB. NO.: 2001-306994 [JP 2001306994 A]
PUBLISHED: November 02, 2001 (20011102)
INVENTOR(s): FUKUI AKIHIRO
APPLICANT(s): NEC SHIZUOKA LTD
APPL. NO.: 2000-117528 [JP 2000117528]
FILED: April 19, 2000 (20000419)

INTL CLASS: G06F-017/60

ABSTRACT

PROBLEM TO BE SOLVED: To provide a **price collecting** method in the case of EC transaction using a **portable telephone** by which a user does not pay cash or visit a **shop** at the time of purchasing **merchandise**, a **merchandise** provider can surely **collect** the **price**, and a **portable telephone** service company can surely increase an income.

SOLUTION: When a **merchandise** provider provides **merchandise information** to the **shopping** mole of a Web server 1 set on the network of a **portable telephone** service company, and a user purchases the **merchandise** by reading the **merchandise information** through a **portable telephone** service base station 3, a **portable telephone** service company, and a switchboard 2 by using a user **portable telephone** device 4 of the **portable telephone** service company, the **merchandise** purchase is notified from the Web server 1 to a **portable telephone** service company. Then, the **portable telephone** service company pays the **price** to the **merchandise exhibitor** instead of the user, and charges the user by adding the communication fee of the user **portable telephone** device 4 to the **price** of the **merchandise** paid for the user.

INTERNATIONAL PATENT CLASS: **G06F-017/60**

...ABSTRACT A1

A shopping **assistance** method and apparatus is provided in which a
shopper **captures information** about an **item** of interest and either
stores it in a **handheld** device or sends it over a mobile radio
infrastructure to a service system for storage...

...system. In either case, the captured data is presented to the user as a
personal **shopping catalogue** (80) **showing**, by **shop** visited (81),
the **items** of interest (82, 83). The **captured data** can then be used
to retrieve additional information, for example, from the websites of the
...

...SPECIFICATION Figure 9 shows the situation already described above where
mobile entity 20 equipped with a **capture** transducer scans label 91 of
an **item** 90 of interest and sends the **data** at the time of **capture**
(see arrow 110) via PLMN 10 and internet 39 to the **shopping assistance**
service system 40 for preliminary processing and **store** -to-catalogue
task execution (here both represented by process 93). The user
subsequently accesses the...

Detailed Description

Detailed Description

... a personalized shopping list. In the preferred embodiment, this function is performed in the retail **store** 119 as the information necessary to sorting the **shopping** list may be specific to each retail **store**. In grouping products according to a sorting criteria as shown in steps 517 and 615...

...5 and 6. In step 703, the kiosk 121 accesses sorting table 413 from the **store** database 111. Each product identifier in the current **shopping** list table 407 is then matched with the product identifiers in the sorting criteria table 413 as shown in step 705, and corresponding sorting data for the selected sorting criteria is **collected** by the kiosk 121. With sorting **data** obtained for each **product** on the shopping list associated with the CID entered into the kiosk 121, the...

...the list having the same sorting data and sends the data to the printer or **hand held** device as shown in steps 519 and 617 in Figures 5 and 6 respectively.

Thus...

Detailed Description

Detailed Description

... way in which the system 1 00 provides shopping assistance to
consumers is by providing **information** on where or how **items** may be
purchased.

As **shown** in Figure 6b, the system 100 provides **information** on the
locations of retailers, a **map** to the retailers, and how the items may
be purchased on-line. In addition to providing information on each
individual item, the system 1 00 also
provides **shopping assistance** on a group of items. Through an "Auto
Shop "

functionality, the system 100 allows consumers 102 to provide purchase
options on the collective group...

...information, such as consumer identification information, information

related to favorite retailers, manufacturers, brands, magazines, or **catalogs** , and bookmarks of **information** related to **products** and/or services of interest. The system 100 associates each product and/or service supported...

Gadget lust -- The coolest new pocket gizmos and digital toys. We want them all!

Steinberg, Don; Bass, Gordon

PC Computing , April 1, 1999 , v12 n4 p214-218, 4 Page(s)

ISSN: 0899-1847

Company Name: Casio; Hitachi

Product Name: Global Positioning Watch; M2 Multimedia Recorder

Presents a listing of new gadgets that combine several different functions into one. Refrains from giving any type of award or **comparison** for each and does not list **products** in any particular order or category. Includes **prices** and manufacturers' names for some of the **products** . Lists **products** that combine functions from technologies/machines like telephones, PCs, televisions, Palm-sized devices, receivers, hard drives, and cameras. **Reports** that there are now **products** available on the **market** such as a matchbook-size microdrive from IBM that can hold 340MB of **information** ; a \$20 television; a Global Positioning Wristwatch by Casio; a hot pink Pentium-based laptop like the Hello Kitty **Note** ; and Hitachi's M2 Multimedia **Recorder** that can **record** video, **photo** , or audio on hard disk. Includes five illustrations, 13 **photos** , and one screen **display** . (CT)

Bob goes shopping -- For the Chinese, 1994 is the Year of the Dog. For the high-tech industry, its the Year of Bob. Meet Mr. Consumer.

Aragon, Lawrence

PC WEEK , December 27, 1993 , v10 n51 pA1, A7, 2 Page(s)

ISSN: 0740-1604

Bob goes shopping -- For the Chinese, 1994 is the Year of the Dog. For the high-tech industry...

Reports on ways high-tech companies can do business with the mass of average consumer. Examines...

... domesticating'' the computer for the people who use them at home and sees personal digital **assistants** becoming necessities. Suggests making software fun and attention-grabbing and foresees CD ROMs as becoming standard in the near future. **Notes** that thousands of interactive TV trials will **take place** this year and that the most successful companies will be the ones who are able to tap the home office/small business **markets** . Includes a cartoon. (cnr)

Descriptors: Marketing; Software; CD-ROM; Interactive Video; Personal Digital **Assistant** ; Home Office; Consumer Information

PRODUCT NAMES: Jango (687511); Excite (594113)

TITLE: Excite's Object-Oriented Power Shopper

AUTHOR: Etzioni, Oren Weld, Daniel

SOURCE: Object Magazine, v7 n12 p52(4) Feb 1998

ISSN: 1055-3614

HOME PAGE: <http://www.sigs.com>

RECORD TYPE: Review

REVIEW TYPE: Product Analysis

GRADE: Product Analysis, No Rating

REVISION DATE: 20020330

...allows real-time multisite searching. The highly distributed nature of the Web means that important **information** is formatted in various ways and comes from many disparate sources. Diverse **data** management tools are required; these can cause problems because the user must know how to use many different tools effectively. Online **shopping** is a good example of the problem because the many online retailers operating over the...

...different inventory methods, interfaces, and abilities. Excite uses software robots, or softbots, which are intelligent **assistants** that operate to search the Web for **information** . The Jango softbot helps consumers find, assess, and buy **products** on the Web. Jango can be queried with specific names of various types of **products** to allow a user to find out what **stores** sell the software and at what **price** . Jango, an OO program, is written in C++. Unlike Web directories, Jango has parallel pull technology, adapter **objects** , and advanced filtering algorithms that

enhance searching and retrieval. Topics covered include Jango versus **offline aggregators** and Jango versus other agent technologies.
